

# DEVELOPING FOR MULTI-COMPONENT ENVIRONMENT

WHILE KEEPING YOUR SANITY

# WHO'S TALKING?

[github.com/jbaruch](https://github.com/jbaruch)

[@jbaruch](https://twitter.com/jbaruch)

[linkd.in/jbaruch](https://www.linkedin.com/in/jbaruch)

**Baruch Sadogursky**  
J\*, G\* and Public Speaking Geek with JFrog FTW.  
Israel | Computer Software

Current **Developer Advocate at JFrog Ltd**

A white LinkedIn profile card with a serrated bottom edge. It features a circular profile picture of a man with glasses and a black shirt. The text on the card includes the name 'Baruch Sadogursky', a bio 'J\*, G\* and Public Speaking Geek with JFrog FTW.', location 'Israel | Computer Software', and a yellow badge that says 'Developer Advocate at JFrog Ltd'. The word 'Current' is partially visible to the left of the badge.

# DEVELOPER WHO?

Job Description:

1. Hang out  
with DevOps

2. Talk about it

[About](#) ▾

Chef is an **automation platform** that transforms **infrastructure into code**. Stop thinking in terms of physical and virtual servers. With Chef, your real asset is the code that brings those servers and the services they provide to life. **An automated infrastructure** can accelerate your time to

# CHEF WORKS WITH COOKBOOKS

## Cookbooks

---

A cookbook is the fundamental **unit of configuration** and policy distribution. Each cookbook defines a **scenario**, such as everything needed to install and configure MySQL, and then it contains all of the components that are required to support that scenario, including:

- Attribute values that are set on nodes
- Definitions that allow the creation of reusable collections of resources
- File distributions

# CHEF WORKS WITH COOKBOOKS

## Cookbooks

# THE SOLUTION

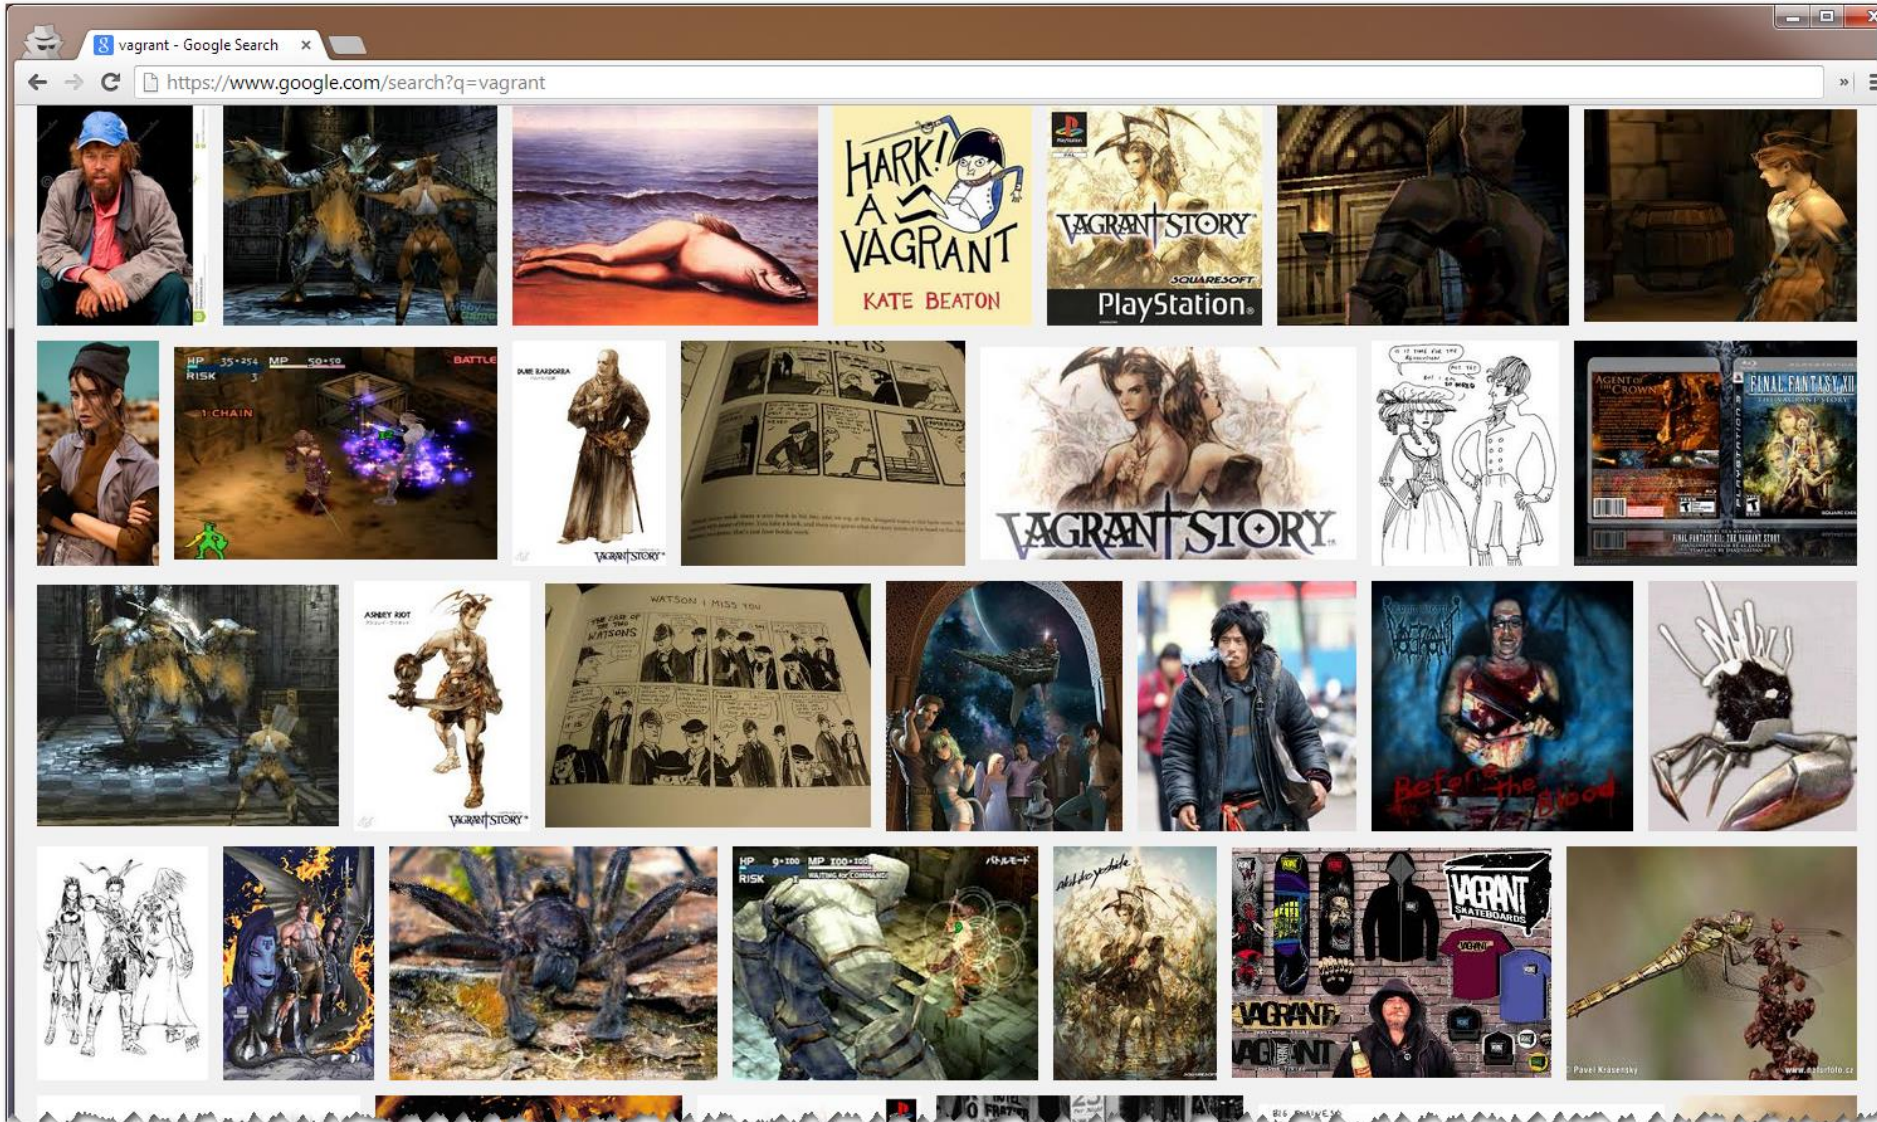

# THE SOLUTION

# VAGRANT WHAT?

# VAGRANT

VAGRANT

## HOW VAGRANT BENEFITS YOU

If you're a **developer**, Vagrant will **isolate** dependencies and their configuration within a **single disposable, consistent environment**, without sacrificing any of the tools you're used to working with (editors, browsers, debuggers, etc.). Once you or someone else creates a single [Vagrantfile](#), you just need to **vagrant up** and everything is installed

# SETUP VAGRANT WITH CHEF

## CHEF SOLO PROVISIONER

Provisioner name: `chef_solo`

The chef solo provisioner allows you to provision the guest using Chef specifically with [Chef Solo](#).

# SETUP VAGRANT WITH CHEF

```
config.vm.box = "centos-6"
```

```
# Enable and configure the chef solo provisioner
```

```
config.vm.provision :chef_solo do |chef|
```

```
  chef.cookbooks_path = "#{checkout}"
```

```
  #chef.data_bags_path = "install/chef/data_bags"
```

```
  chef.roles_path = "install/chef/roles"
```

```
  chef.add_role("bintray_common_vagrant_server")
```

```
  chef.add_role("bintray_interaction_vagrant_server")
```

```
  chef.add_role("bintray_download_vagrant_server")
```

```
end
```

```
end
```

# SETUP VAGRANT WITH CHEF

```
config.vm.box = "centos-6"
```

```
# Enable and configure the chef solo provisioner
```

```
config.vm.provision :chef_solo do |chef|
```

```
  chef.cookbooks_path = "#{checkout}"
```

```
  #chef.data_bags_path = "install/chef/data_bags"
```

```
  chef.roles_path = "install/chef/roles"
```

```
  chef.add_role("bintray_common_vagrant_server")
```

```
  chef.add_role("bintray_interaction_vagrant_server")
```

```
  chef.add_role("bintray_download_vagrant_server")
```

```
end
```

```
end
```

# THE SOLUTION

# THE SOLUTION

# AS EASY AS...

The screenshot shows the Jenkins web interface for a build. The top navigation bar includes 'Jenkins', 'bintray-releases', and '#2184'. On the left sidebar, there are several navigation links: 'Back to Project', 'Status', 'Changes', 'Console Output [raw]', 'View Build Information', 'Polling Log', 'Injected Environment Variables', and 'Git Build Data:bintray'. The main content area is titled 'Console Output' and displays the following text:

```
Skipping 23,946 KB.. Full Log  
+ chmod +x bintray/jenkins-scripts/vagrant_starter.sh  
+ ./bintray/jenkins-scripts/vagrant_starter.sh /media/ramdisk  
Checkout directory is '/media/ramdisk/jenkins-workspace' -  
Current cookbook revision is a28a1f2b0c5ca51d4b64934fd156d20  
Last documented cookbook revision is a28a1f2b0c5ca51d4b64934  
Documenting current cookbooks revision  
Checking to see if the last 'vagrant up' log contains any error  
Raising Vagrant machine and documenting process  
[default] VM already created. Booting if it's not already running
```
